

# MARBLE PRIX

Let the  
Race begin...

# INTRODUCTION

What is Marble Prix?

Marble Prix is an innovative Web3 gaming Ecosystem that allows users to participate live Marble races via blockchain using our dapp.

## MARBLE PRIX FACTS

- First of its kind project to combine offchain Live race with Blockchain user experience.
- Blockchain based live races on innovative race tracks operated based on UNIX clock timing and relay contract amalgamation.
- The team have built up two Tracks in the name of Satoshi & Vitalik to honour the legends of Crypto space and guess what?
- Few more tracks is on construction including CZ track, Elon Track.
- The Aim & objective of the ecosystem utility is to allow users to participate in Marble Prix race tracks based on live race streams on the V1,
- Then evolve the ecosystem to support Meta races of P2E in V2, PVP simulation races in V3.

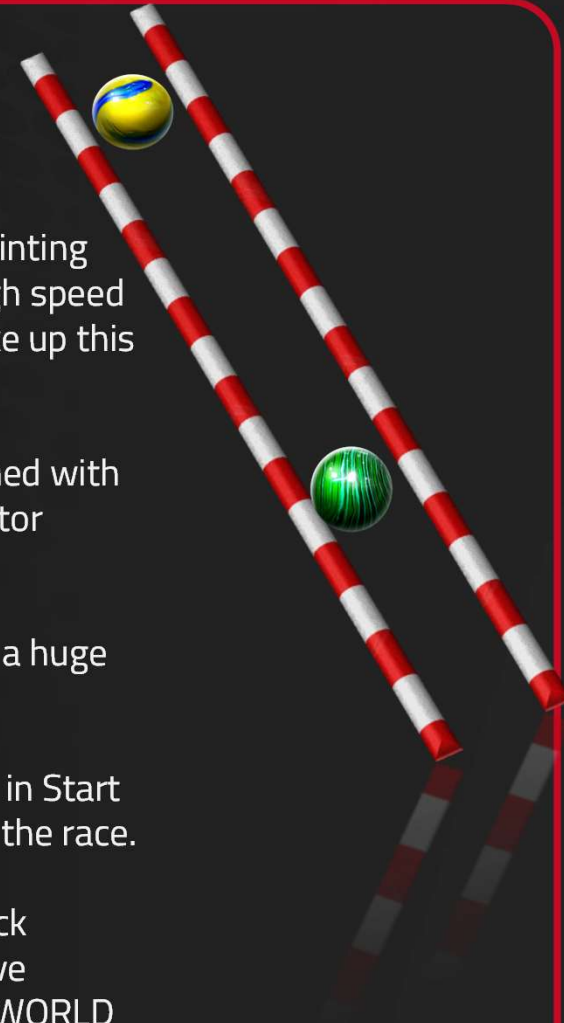

## ► HOW THE GAME WORKS ?

- Users will have 1 to 7 Marbles to place their bets.
- User should possess \$MARBLEX tokens to play the game, claim the prizes, NFT rewards etc.,
- The ecosystem will run races for every 4 hrs via auto deployer contracts.
- Each Race has 4 phases and betting for the races will be on ETH.
  - First 15 mins for Bet placement.
  - Second 15 mins for Race initiation
  - Next 15 mins for 7 laps of race in the presented track.
  - Last 15 mins for winner declaration and Prize distribution.
- Each of these races will have medium to prime slot racing options. Like each race will have a defined limit to place bets from 0.2 ETH to 1 ETH.
- Users should hold \$MARBLEX tokens to place the bet, win the bet, claim the bet, claim NFT Marbles.
- Once the race completes, the winning users will be able to claim their winnings from the dapp.
- The race will be telecasted live with Marble weight placement bridge, UNIX clock timer in the TV display. The race number will be displayed in live matching the contract relay number.

## LIVE RACE FACTS

- Vitalik Race track is constructed using high profile 3D printing materials, the finish line will be captured with sports high speed sensor cameras. 60 component parts were used to make up this Vitalik Bridge.
- Satoshi track is made up with excellent wood and polished with fine carpentors. It comprises of 12 bends and a lego motor bridge.
- Race will be live streamed with UNIX Clock, streamed in a huge Television from the Racing hub.
- Race stands will have weigh bridge and will be captured in Start line camera, total 3 cameras will be used to live stream the race.
- A television will be presented in the room with UNIX clock display to verify the race occurring time along with the live stream video. UNIX CLOCK TIME IS SAME ACROSS THE WORLD and even if you carry it to SPACE too.

# COMPETITIONS

Nothing brings gamers together like a bit of competition. Whether its Racing games or the latest release of RPG games, these games engender amazing amounts of community and togetherness.

The P2E games has inspired some of the most heated competitions around the blockchain space that the world has ever seen, and it's only getting bigger.

We want to make blockchain more interesting bringing this live element into the gaming.

MARBLE Prix is open 24/7 to all parts of the world. The game that never sleeps.
